

Expert Drill Step 1 of 1

Made by The Dev Team

Instructions

To see if you truly have the steel to become a master of billiards. Set up the balls in the following configuration. With one shot, sink all solids, without sinking any stripes.

Name: John Smith

Rank: Diamond II

Age: 31

Location: Glasgow, Scotland

Bio

Hi I'm John I live in Glasgow all my life. Ever since I was 17, I've had an unwavering passion for billiards. It all started when my older brother surprised me with a pool table, and then when he showed me how to break, I never looked back.

I dedicated countless hours to honing my skills and mastering every technique I can. I frequent many pubs in Glasgow to hone my craft and I even participate in the local A1 league.

But, I also enjoy sharing my passion for pool with others, so if you want to play together or get some tips, stop by at Felson's.

Ever thought pool was too two dimensional? This course adds another dimension and guides you how to maneuver your ball upward and over your opponent.

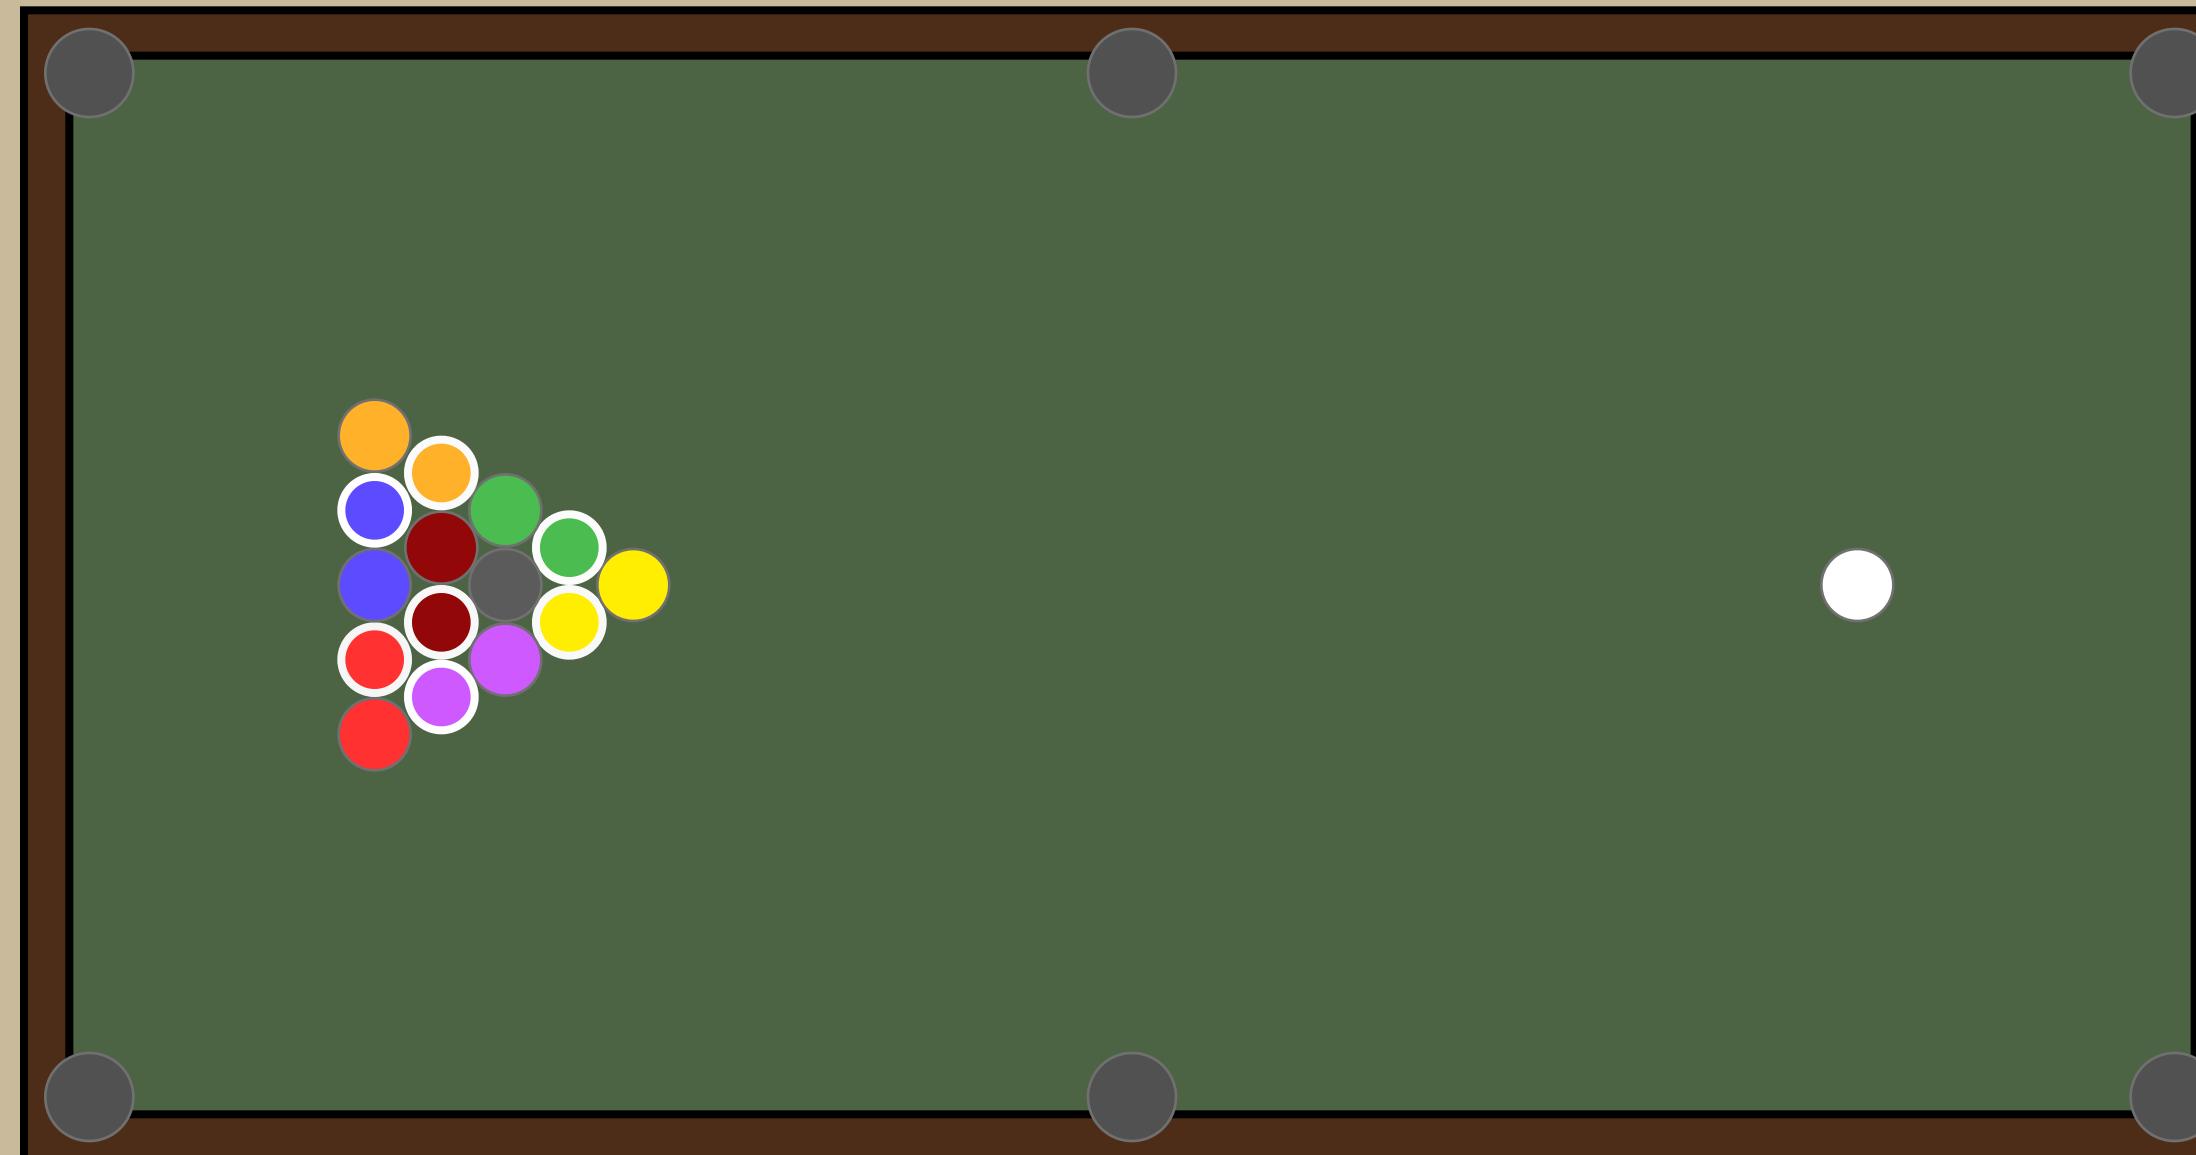

Fundamentals

This course will cover the basics and the fundamental points of a

Fundamentals Step 1 of 4

Made by The Dev Team

Next Step

Instructions

Place your ball as shown, in the standard break formation. The closest ball in the set should be centered between the second dot on the length of the table.

Practice Breaking from multiple angles. The most common technique is to hit the cue straight onward with a hard strike. However, hitting the other balls in the formation may lead to more desirable position for your second turn.

Fundamentals Step 2 of 4

Made by The Dev Team

[Previous Step](#)[Next Step](#)

Instructions

Set the balls up as shown. The purpose of this exercise is to practice, mid-range close-to-pocket shots. The common mistake with this shot is that newer players may let the cue ball follow through the red ball, resulting in a scratch and an advantage for the other player or worse a loss if it is the 8-Ball.

There are many ways to go about this situation with each being advantageous in certain scenarios. However, in this one, the most preferred method may be a backspin to prevent the cue ball from following through and place the cue ball in the center left table position. This is favorable due to its ability to play to other possible balls on the table allowing a follow-up shot to continue your turn.

Fundamentals Step 3 of 4

Made by The Dev Team

[Previous Step](#)[Next Step](#)

Instructions

Set up the balls as shown, taking care that there is about a finger's gap between the bumper and the yellow ball. This exercise is too practice accurate shots to a corner when the ball is close to the wall and a cue ball that is not aligned.

You can practice this shot by varying the angle of the cue ball in respect to the yellow ball's closest wall. As the angle gets more towards 90 degrees with the wall the more difficult the shot becomes, inversely the more parallel you get to the wall, the easier the shot becomes as it becomes more in-line with the pocket.

The difficulty with shot comes with getting the correct angle. A trick is take your stick and point it over the yellow ball to the desired pocket. This will show you the angle to hit the ball.

Pool Sharking Guide

Pool Sharking is an effective but morally questionable way to make some quick cash. A pool shark is someone who purposely plays significantly worse competition in order to win money bets.

To be an effective pool shark, you first must be somewhat experienced at the game of pool. This is required of course because you need to be good enough to be able to find a number of players who you will reliably win against.

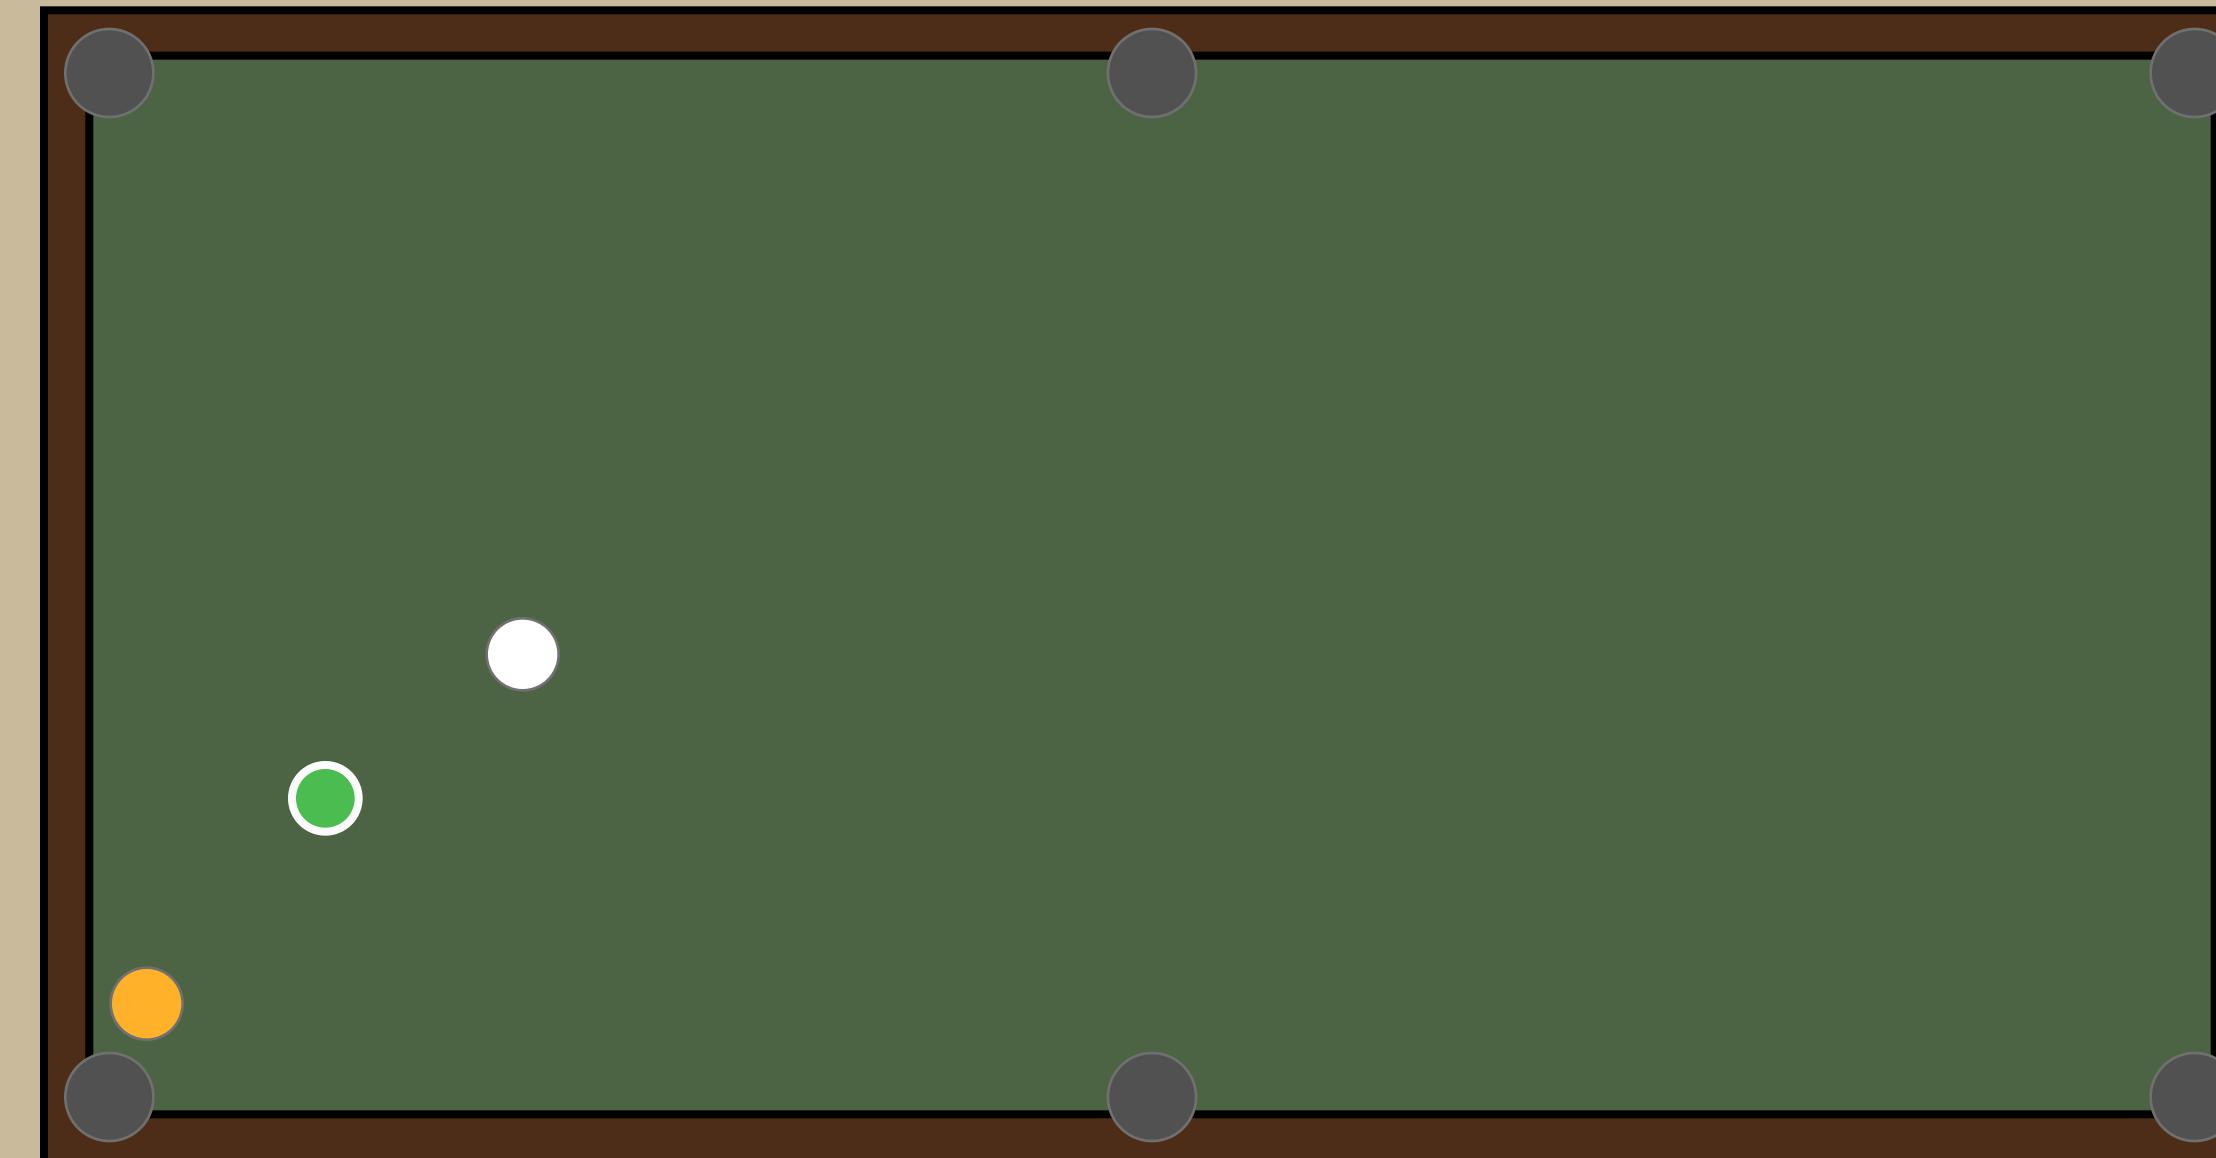

Another requirement to pool sharking is having cash. This requirement isn't as important since you will be making money as you continue to pool shark. You can also make bets without actually having the money and if you miraculously lose, you can simply slip away when no one is looking. A good forty yard dash time is also very handy if you can't sneak your way out.

Finally, a very useful trick you can use to aid in your sharking is greasing the cue ball when the opponent isn't looking. This is done so that when they try to hit the cue ball, the stick will not make good contact causing them to miss their shot and hopefully make the cue ball in a pocket. This is best used when the opponent only has the eight ball remaining.

Hopefully these tips and tricks can help you perfect your sharking game.

Fundamentals Step 4 of 4

Made by The Dev Team

[Previous Step](#)

Instructions

The purpose of this exercise is to introduce the basics of Banking the cue ball. In this scenario you are solids, and in your path to the corner is the striped Green ball. A careless may wish to take the risker method and jump the stripe, however a better alternative would be to shoot the cue ball into the upper bumper and hit the orange ball into the pocket. This is a simple single bounce shot.

After setting up the balls in the configuration above, take a few shots resetting each time to get a feel for it. Perhaps even change the distance of the balls to each other to generalize the shot.
